

IN THE CLAIMS:

The following is a complete listing of claims in this application.

The following is a complete listing of claims in this application.

1. (currently amended) A light emitting device comprising:

a substrate having a flat upper surface;

an LED mounted on the upper surface of the substrate;

a first transparent layer mounted on the substrate for sealing the LED;

a second transparent layer ~~provided around~~ having an underside surface coextensive with the upper surface of the substrate and mounted on the upper surface of the substrate so as to surround the first transparent layer;

~~fluorescent material being included in either of the first transparent layer and the second transparent layer;~~

particles of coloring agent included in the second transparent layer; and

a reflector layer formed on peripheral outside walls of the second transparent layer except an upper side thereof.

Claims 2-3 (canceled).

4. (original) The light emitting device according to claim 1 wherein the second transparent layer has an inverted trapezoid shape in section.

Claims 5-9 (canceled).
